We lead because we follow

At Ousus Steel, we continue to be inspired by the unwavering/principles of service. And that is what helped us succeed in contributing to KSA's development.

The trusted name in steel fabrication in the region.

Ousus Steel Factory is a Saudi foreign industrial firm with 15 years of solid experience in steel works. Across KSA, we unanimously stand for good service, reliability, and quality products.

Ousus' factory is located at Al-Manakh Industrial City in Riyadh, Saudi Arabia. It is spread under a covered hangar of 5,000 m2, where all facilities are accommodated.

All steel works are fabricated in-house without compromising quality of works and abiding by all the safety standards.

Raising the bar, transforming the future

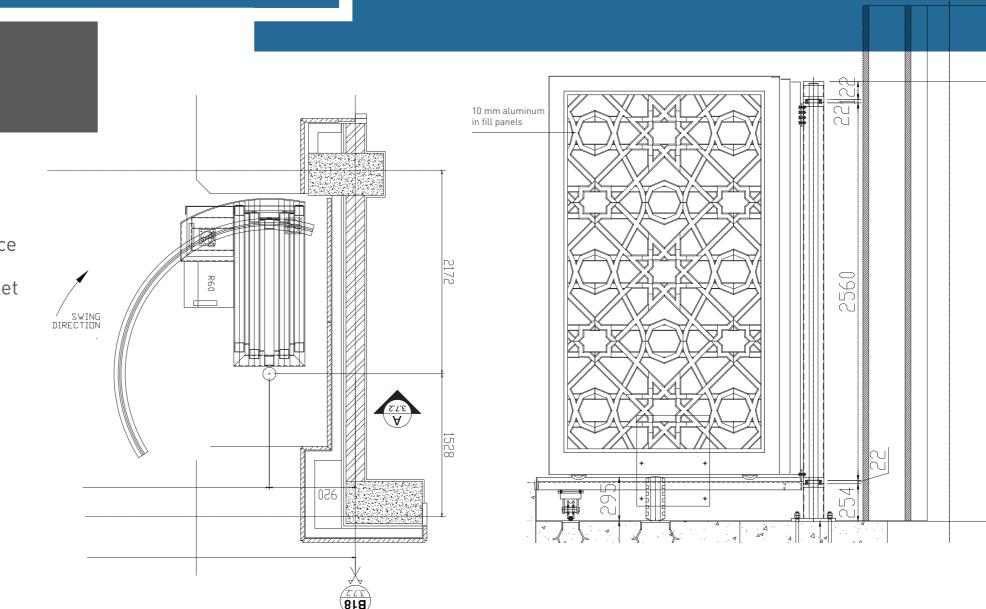

We pride ourselves on our continuous innovation and product development to meet the ever-changing demands of the industry. The remarkable success of Ousus steel is built on cutting edge, state-of-the-art technology, in addition to a dynamic, high talented workforce; and a position of strength that has been rewarded by a strong client-Ousus trust relationship.

Why Ousus Steel

Committed to the Core

The short history of Ousus Steel has been one with relentless expansion and continuous innovation while redefining excellence in the industry. Our large know-how library in metal works products is perfectly positioned to cater to the increasing market demand for more customized steel products.

One of the recent challenges that Ousus Steel was approced with, was the desing of special gates which had telescopic as well as swing mechanisim. This was required due to limited space. The competition was with international companies, but Ousus design was unique and approved. All main gates were supplied by Ousus Steel.

Enviroment Above All

All Ousus Steel clients enjoy the value-added benefits of aLEED requirements. We comply with the highest performance of greed coes, such as using recycable materials of 48% and low COC. All our paint are low VOC and our powder paint is zero VOC.

Times change, Quality doesn't

At the moment, Ousus Steel symbolizes the following:

- High quality products trusted by clients
- Triumph of consistent innovation
- The success of a focused vision

Our personnel receive some of the most rigorous Quality and Safety training in the industry. Ousus is qualified as level 2 ISO 9001 preparation.

As we embark on a new era of innovation, we are realigning our distribution, customer service and support activities in the purpose of achieving superior standards and expanding the focus on high quality offerings.

Green thincking is therefore an integral part of our operational procedures and not looked at as another certification.

carry out the needed work

Our main equipment includes:

- Press break machines
- Shearing machines
- CNC plasma cutting machines
- CNC punching line
- MIG / stick welding machines
- Automatic conveyor shot blasting machine
- Arc spray galvanizing line
- booth and oven to accommodate large pieces
- 8 & 5 tons forklifts

Our commitment to excellence requires the availability of heavy duty and highly functional machineries, equipment, and tools necessary to

Powder painting line with 7m long x 2.5 m wide x 3.5 m high

People

"A lifetime dedicated to purposeful services"

At Ousus Steel, everything begins and ends with commitment.

Commitment in performance, quality, and results. Commitment to our team and their individual success. Commitment today and in the future.

As an investor in its workforce, Ousus Steel recognizes that the quality of its products and services results form a highly trained and motivated team.

People: Our most valuable investment

People who work at Ousus Steel are special. They bring in high quality and commitment to their work that is rarely seen elsewhere. Our success as a business derives from creating a culture that provides a motivating and rewarding environment, and we encourage everyone to be part of this experience.

The Ousus Team

- Mechanical Engineers
- Civil Engineers
- AutoCAD structural detailers specifically experienced in metal and steel works
- Accountants and cost controllers
- 120 skilled welders and 30 laborers and painters
- All the team members are well qualified and have been working for the company for more than 15 years knowing the way of steel fabrication including high quality and fast delivery schedule.

New and practical ways of solving fabrication and installation problems are thoroughly deliberated to achieve client satisfaction. Thus, our team is backed up with periodical trainings to upgrade its skills while reinforcing them with new computer software, hardware, and technology to meet commitment and excellence.

All types of metal works such as Spiral Staircase, Balustrade, Wall Mounted Handrails, Staircases, Grating Support Structure, Marble Ladders, Access Traps, Chandelier Hangers, Manhole Covers and Louvers.

Products

Don't just rise, shine

Consistently for many years, our nationwide clients have come to trust us for the outstanding caliber of our products range.

We are dedicated to distributing durable, efficient, competitively priced steel and related products.

Type of materials fabricated

- Carbon Steel
- Stainless Steel
- Steel with Wood Claddings
- Structural PVC / Fabric
- Aluminum Framing and Louvers

Services

- Site visit
- Design: Structural Calculations and Detailing
- Fabrication
- Shot-blasting
- Galvanizing: Thermal Arc or Hot Dipped
- Painting: In-House Powder or Liquid
- Installation
- Repair

Products

- Steel stairs, spiral / helical stairs, and footbridges
- Fences: all types of fences
- Walk Ways: Suspended or Cantiliver types
- Steel Doors and windows
- Glass & Wood Railings
- Baluster and wall mounted hand rails
- Stainless steel stairs, railings, doors, gates, windows, ladders, louvers, gratings, and others
- Car shade frames including PVC or Fabric covers
- Complete horse stables, doors, windows, horse barn gates, horse clinics, and horse railings
- Parking column protection and guard rails
- Steel and Wood Pergolas
- Metal Decking
- Acoustic Panels
- Gas Tank Sheds
- View screen panels, louvers, ventilation grids
- Ladders, ladders with safety hoops, aluminum ladders
- Marble ladders and structural frames for marble installation
- Substations
- Access traps and manhole covers
- Vanity top supports
- Skylight steel structures
- Curtain walls & ceiling hanger frames
- Chandelier handles and supports
- Smoke exhausts and passdomes
- Pipe bollards steel or stainless steel
- Structural steel works including purlins, flashing, insulation, and civil works
- Aluminum Musharabiat, Louvers, and Sheet Processing
- Custom made products

• Gates: swinging, sliding (up to 20 meters long), telescopic

My life is my message Ousus Steel Factory

Operates as per the highest environment standards by implementing LEEDs. Also by following the international quality assurance standards. It had undergone training for ISO 9002 and had successfully finished Phase 2 out of Phase 3. We are now awaiting for the implementation of Phase 3 so that we can acquire the certificate.

Ousus quality assurance program is geared toward high standards and meets client requirements. This quality assurance & procedures (QAP) is a description of the procedures that must be followed to determine the quality of works of Ousus to meet client satisfaction. The Management of Ousus Steel Factory completely supports the policies and procedures described in this QAP. Ousus is committed to providing the resources, including facilities, equipment and personnel to ensure adherence to the Quality Assurance and Quality Control protocols defined in this document.

Ousus Quality Assurance & Procedures (OAP)

My life is my message Ousus Steel Factory

The General Manager reviews work to ensure that appropriate facilities and resources exist before accepting the work.

Fabrication Engineering Department makes sure that the client's approval on shop drawing and/or material submittal is taken before orders are fabricated.

The Fabrication & Installation Planning & Control Department shall make sure that materials and facilities are timely available for the fabrication and installation of materials and monitors that materials are fabricated and installed on target dates.

Production Department sees to it that materials to be used for fabrication are properly inspected before fabrication and fabricated as per client's target date.

Ousus Quality Assurance – Fabrication inspects quality of the fabricated materials if it conforms with the client's approved shop drawing.

Production Department shall make sure that fabricated materials are approved by Ousus Quality Assurance – Fabrication, properly handled, well protected & transferred to the Finished Products Area awaiting delivery to the site.

Delivery Department assures proper handling of the fabricated materials until it is loaded in good condition in the client's area.

Site Engineering Department are in charge of installation of fabricated materials in project sites. Each site engineer is responsible for the completeness of work in their respective assigned project site. The site engineer shall request inspection of the fabricated materials from client's Quality Control Department to see that only materials that passed client's inspection shall enter site premises. Rejected fabricated materials shall be returned to the factory and to be repaired as per client's comments.

Ousus Quality Assurance – Installation shall make sure that all installed fabricated materials at site are installed as per client requirements by securing Certificate of Accomplishment from the client.

The overall Quality Assurance Manager is responsible for the monitoring of the quality assurance program and will make recommendations for corrective actions to the General Manager.

Quality is the responsibility of every employee. All personnel will have access to this QAP and subsequent standard operating procedures (SOPs) and will strive to meet the specified requirements in these documents. The quality assurance manager will maintain the training program to ensure that all personnel has the knowledge necessary to meet the requirements of the QAP. No deviations from the policies and procedures are allowed without the documented approval of the General Manager and the Quality Assurance Manager. This QAP will be reviewed and revised as necessary at least annually. Major revisions will be forwarded to appropriate copy holders.

Together, we can accomplish more

Discover how Ousus Steel can help you meet your demand for top grade products and services. We would be delighted to hear from you. Please direct your query here and we will respond within two business days.
